Highlights
<ul style="list-style-type: none"> <li>Realizing the need for an automation partner for Family Entertainment Centers (FECs) in India, Semnox was formed in January 2008 by Senior Professionals from the IT industry. The founders bring close to 50 person years of industry experience</li> <li>Semnox provides solutions and services for the Gaming and Entertainment industry</li> <li>Semnox is Head-Quartered in Mangalore, India</li> <li>Parafait Server is Semnox's Flagship product for automating FEC operations. The product includes all features required for automating FEC operations and is aimed at reducing the Total Cost of Operations for FEC owners</li> <li>Company also develops PC and Console games for FECs, Educational Institutions and large Corporations</li> <li>The games developed by Semnox can be deployed at FECs with minimum or no extra hardware cost</li> </ul>

<ul style="list-style-type: none"> <li>The Leisure industry in India is still in its nascent stages and is growing at a very fast pace. Family Entertainment Centers (FECs) and other similar entertainment zones are fast becoming popular. But there have not been many technology service providers in the domestic market to help FEC owners improve operations and reduce Total Cost of Ownership (TCO). Hence FEC owners have had to rely on international companies. Semnox solutions was founded to bridge this gap, and to provide quality, cost effective technology solutions for the FEC owners.</li> <li>Semnox Solutions is Head-Quartered in Mangalore, India and was founded by professionals who have held senior and middle management positions in Infosys Technologies (A leading Global IT firm). The founders bring extensive experience (close to 50 person years) in delivering technology and business transformation solutions for various large global Fortune 100 companies. Semnox is a young, dynamic company with the vision to become India's leading Gaming Solutions provider by 2010.</li> <li>Parafait Server is the State-of-the-art Wireless Debit card system for FEC automation. The product packs all features required for complete automation of FEC operations, including Touch screen based POS system, Redemption and inventory management module with barcode support, wireless connectivity, Debit card based game management and internet based management control. With no compromise on the features, the product is priced aggressively to provide at least 30% - 40% cost advantage to the FEC owners when compared to the other solutions in the industry today. Parafait has been selected for roll out at one of the leading FEC networks in India.</li> <li>Semnox develops 2D and 3D games for FECs. The games are designed such that there is minimal hardware dependency and hence installation is fast and easy. Additionally, multiple games can be switched on the same game terminal thus providing the FEC owners with greater flexibility, and customers with better game 'freshness'.</li> </ul>
